SUMMARY

Highly driven Software Engineering Senior with internship experience in data analytics. School and project experience in Object Oriented Programming, Agile Methodology, Algorithms, Software Enterprise, Operating Systems, etc. Seeking either a near-future internship or full-time position in the area of Software Engineering upon graduation in August 2025.

EDUCATION

B.S. Software Engineering

Arizona State University, Tempe, AZ

Expected August 2025

3.7 GPA

TECHNICAL SKILLS

Programming Languages: Java, C/C++, C#, Python, Bash/Shell, SQL, MATLAB, JavaScript (learning)

Front-End: HTML, CSS

Tools, Databases, and OS: AWS, MySQL, Git, GitHub, Windows, MacOS, Linux/Unix, UML

RECENT WORK EXPERIENCE

McKee Foods Corp, Fayetteville, AR: Sales and Marketing Analyst Intern II (20 HR/WK)

07/2023 - Current

- Used Tableau and Alteryx for data manipulation, visualization, and analytics for analysis of trends and informed recommendations to increase sales potential.
- Analyzed and created more efficient processes of existing data modification.
- Collaborated with McKee and Walmart leadership to make crucial sales decisions based on data.

United States Air Force, Little Rock, AR: Aircraft Maintainer

03/2019 - 03/2023

- Completed leadership and followership training.
- Collaborated with colleagues in developing and refining maintenance procedures.
- Analyzed engineering drawings and schematics to troubleshoot systems and diagnose solutions.

RELEVANT PROJECTS

Class Due Date App (Java), Solo Personal Project

Spring 2025

- Created an application to read all due dates for my classes and give me an ordered list based on date.
- Retrieved JSON format API files from html on school website, parsed them, and output desired information via Java Swing GUI.

NASA Psyche Asteroid Simulation (C#, Unity), Collaborative Class Project

Spring 2025

- Created a rover sample extraction simulation using Unity to help NASA bring attention to Psyche asteroid mission.
- Built and used C# scripts to support functions in simulation such as menu UI button functionality.
- Collaborated with teammates using Agile ideology, including GitHub and Taiga.io.

Gym Scheduling Application (Java), Collaborative Class Project

Summer 2024

- Devised a program using Java which remembers users' info and allows the creation and signing up of classes.
- Created UI using JavaFX allowing for a more seamless experience using the app.

Client and Server GUI Game (Java), Solo Class Project

Summer 2024

- Generated a GUI game using Client and Server implementation with the option of local host or remote host.
- Integrated the ability to view leaderboards or play a movie quote guessing game.

Board Game Event Database (Java, MySQL), Collaborative Class Project

Spring 2024

- Designed MySQL database for board game events.
- Constructed CLI interface using Java for viewing, inserting, updating, and deleting database entries.

EXTRACURRICULAR WORK

The Complete 2024 Web Development Bootcamp by Dr. Angela Yu, Online

02/2025 - Current

- Strengthened my understanding of HTML & CSS.
- Ramped JavaScript proficiency for professional development.
