SUMMARY

Software Engineering graduate with hands-on experience developing full-stack applications (Java, React, C#, MySQL) and applying Agile practices in collaborative projects. Skilled in data analytics (Tableau, Alteryx) and automation workflows. U.S. Air Force veteran with proven problem-solving, technical troubleshooting, and leadership abilities. Seeking an entry-level Software Engineer role to build scalable, user-focused applications.

EDUCATION

B.S. Software Engineering – Arizona State University, Tempe, AZ
GPA: 3.71 | Graduated July 2025

TECHNICAL SKILLS

- **Languages:** JavaScript, Java, Python, C#, SQL
- **Frameworks & Tools:** React, REST APIs, Vue 3, Vite, Spring Boot, Git/GitHub
- **Front-End:** HTML5, CSS3, JavaScript (ES6+)
- **Databases & Cloud:** MySQL, AWS
- **Data & Analytics:** Tableau, Alteryx
- **Operating Systems:** Windows, Linux/Unix, macOS

RECENT WORK EXPERIENCE

McKee Foods Corp, Fayetteville, AR: Sales and Marketing Analyst Intern II — 07/2023 - Current

- Automated recurring data workflows in Alteryx, reducing manual data processing time.
- Developed interactive dashboards in Tableau to visualize sales trends and guide strategic decisions.
- Partnered with McKee and Walmart leadership to translate data insights into actionable recommendations.

United States Air Force, Little Rock, AR: Aircraft Maintainer — 03/2019 - 03/2023

- Analyzed engineering schematics and technical manuals to troubleshoot and repair complex aircraft systems.
- Implemented process improvements in maintenance procedures to increase efficiency and reliability.
- Completed leadership and followership training, developing strong collaboration and communication skills.

RELEVANT PROJECTS

Movie Search App (React, REST API), Solo Personal Project — Fall 2025

- Integrated OMDb API to fetch and display movie data using dynamic React components and conditional rendering.
- Implemented search UI, error handling, and responsive layout improvements.
- Strengthened experience with API usage, JSON parsing, and front-end state management.

Personal Portfolio Website (React), Solo Personal Project — Spring 2025

- Designed and deployed a responsive React-based portfolio site showcasing projects and skills.
- Integrated animations, functional components, and interactive UI elements to improve recruiter engagement.

NASA Psyche Asteroid Simulation (C#, Unity), Collaborative Class Project — Spring 2025

- Developed a rover sample extraction simulation in Unity to support NASA's Psyche asteroid outreach mission.
- Implemented C# scripts for UI functionality and collaborated using Agile practices with GitHub and Taiga.io.

Board Game Event Database (Java, MySQL), Collaborative Class Project — Spring 2024

- Designed and implemented a relational database to track event dates, attendees, and associated games.
- Built a CLI interface in Java to insert, update, and query database records.

Extra

- U.S. Air Force Veteran — Secret Clearance (inactive, can be reactivated if applicable).
- Strong foundation in Agile/Scrum methodologies and collaborative software development.
